List under Biology Courses for Majors

BIOL 1101 Supplemental Laboratory

This course allows a transfer student to make up a laboratory deficiency at the introductory level.

May be used only for **introductory courses** and with the approval of the department.

Prerequisites: Permission of Department Chair. Lab fee: \$30.00.

Justification: The Biology & Chemistry faculty feels that labs are an integral part of most science classes. For this reason all courses in the major have the labs as part of the course. Frequently transfer students have not taken labs with lectures and would need to take the entire course to make up the deficiency. With this supplemental lab course, students will be allowed into an existing lab without taking the corresponding lecture.
