CSDO 3321 Anatomy and Physiology of the Speech Mechanism
Three semester hours.

This course focuses on the major anatomical structures and physiological systems that support speech production. Specific emphasis is placed on the unique neuromuscular adaptations and species-specific behaviors associated with speech production. Prerequisite: Admitted to the CSDO program and in good standing in the College of Education or department approval. Admission to the College of Education and 2.7 overall grade point average. (Formerly ECDC 3324)

Justification:
To avoid having to submit multiple UCC documents each time the GPA is altered, it was decided to include a standard statement. "Admitted to and in good standing..." implies that the student is maintaining the required GPA.
