PSYC 3304 Learning and Memory Three semester hours. Familiarizes the student with the general principles of learning and memory by examining various learning theories, memory research, perception, information processing, and problem-solving. Prerequisites: PSYC 2301 and PSYC 3302 or permission of instructor.							
Justification: PSYC 3302 Research methods should not be a pre-requisite for the class. Class can be taken after PSYC 2301.
