Provide summary of the last cycle’s use of results and changes implemented
This statement should specify if the outcomes addressed were a continuation of previous ones, new outcomes, or modified versions of previous outcomes. In addition, the statement should include a concise analysis of the assessment data collected during the previous year, a brief explanation of actions taken to address specific outcomes, an evaluation of how these actions contributed to the improvement of the unit, and any recommendations formulated. Assessment data must be viewed and discussed by the unit during this process.

After reviewing last years results, the benchmark was met. One big change implemented was that...
visitors to the testing center were always greeted upon entering. When their business was done, we made sure that all their questions were answered by asking if they had anymore questions or needed more information. In addition, we always provided them with assistance by asking if they needed to conduct further business at the University.

**List of unit-level outcomes**
