Athletics -- Dr. Steven Garippa	NAIA eligibility processing grade records	Prior to inter- collegiate competition; continually monitors until graduation	Every student- athlete will maintain satisfactory academic standing.	90% of student- athletes will maintain satisfactory academic standing with an ultimate goal of obtaining a baccalaureate degree. After completion of the 2nd semester of attendance and from then on, a student must have accumulated a minimum of 24 institutional credit hours in the two immediately preceding terms of attendance. Upon reaching junior academic standing, 90% of student- athletes will have a cumulative GPA of at least 2.0 on a 4.0 scale.	The athletic program is in an early developmental stage. Of the five student-athletes who completed their eligibility in 2003-2004, three have already graduated with their baccalaureate degree. The other two are scheduled to graduate in December 2004. The combined GPA for all was 2.718. At the time of eligibility processing student-athletes not meeting this criteria were removed from the roster of that team until they meet this criteria. At the time of eligibility processing student- athletes not meeting this criterion are removed from the roster of that team and are not allowed to complete intercollegiately.	Continue monitoring academic progress of all student-athletes. Encourage or mandate student-athletes study halls or attendance in tutoring programs.

Athletics -- Dr. Steven Garippa	Team records	Each sports season	Each sport should be competitive at the regional/ national level.	Each team will achieve at least as many wins as losses in their overall season record. Each sport will be represented in "post season" play.	In this assessment period, two of TAMIU's five sports achieved winning overall records. (Better than .500 winning percentage). Three of five team sports participated in conference post season play. Two of those three teams advanced to NAIA Region VI competition. In the individual sports, a cross country athlete became the first TAMIU student-athlete to participate in NAIA National Championship event.	More attention must be given to recruiting, retention, and program development of the team sport that did not achieve a .500 winning percentage. This means of unit assessment and criteria for success will be carried over to the upcoming academic year.

Athletics -- Dr. Steven Garippa	Budget reports	Annual	An efficient and cost-effective support system for the operation of the existing athletic program should be developed and maintained.	50% to 60% of the athletic operating budget will be met by locally generated fees. A support system for athletic scholarships will be established to fund 50% of the maximum scholarship allowed by the NAIA.	Fees are now being discussed at the Executive Level to supplement funding for Athletic and Recreational programs. Fundraising events were conducted to generate scholarships revenues. These events generated approximately \$18,000. The Dust Devil Alliance, an athletic advertising package, generated approximately \$37,000.	This dynamic factor will need to be monitored so that program development will not exceed student population growth. Significant effort must be made to increase the funding available for athletic scholarships in order for TAMIU to be competitive at our level.
