September 11, 2014
RONDA 1 –Mexico’s Reforms

The areas now available to private firms range from deep waters to mature fields and nonconventional reserves such as shale gas. Mexican Government identified 109 blocks for the first round of bids. It expects investments of around $50 billion over the next four years, including partnerships with Pemex.
Exploration & Production contracts shall only be granted through a competitive bidding process, organized and regulated by SENER, Secretary of Energy, Secretary of Finance, and the CNH, Comision Nacional de Hidrocarburos.

Under the constitutional reform and the Hydrocarbons Law:
SENER is responsible in the selection of areas for public bidding and establishing the technical and financial qualifications for bidders;
CNH is charged with conducting the bidding process, evaluating bids and awarding contracts; and
The Ministry of Finance establishes the economic and fiscal terms of the E&P contracts.
Midstream and Downstream

All midstream and downstream hydrocarbon activities may be carried with permits. These are to be issued by SENER or the Energy Regulatory Commission to any qualified person.
PERMITS

Permit from SENER is required for the following:

• Treatment and refining of petroleum;
• Processing of natural gas; and
• Import and export of crude oil, natural gas and petroleum products.
PERMITS

The Energy Regulatory Commission issues permits for

• Transportation, storage, distribution, compression, liquefaction, decompression, regasification, marketing and retail sale of crude oil, natural gas, petroleum products and petrochemicals; and

• Integrated pipeline transportation and storage systems.
PERMITS

Any person who currently engages in treatment, refining or processing activities, and who does not have a permit granted by SENER will need to obtain a permit from SENER under the new law no later than June 30, 2015, to be able to continue such activities.
PERMITS

• Any person who currently engages in transportation, storage, distribution, compression, liquefaction, decompression, regasification, marketing and retail sale activities, and who does not have a permit granted by the Energy Regulatory Commission will need to obtain a permit from the Energy Regulatory Commission under the new law no later than December 31, 2015, to be able to continue such activities.
Property Agreements

• The consideration for the purchase, use or occupation of land, goods or rights that are necessary for conducting E&P activities shall be negotiated directly between property owners and the contractors or State Productive Enterprise, as applicable.
Property Agreements

For E&P projects that reach commercial production, property owners may be paid a percentage of the revenues that are related to the contractor or State Productive Enterprise for the particular project, deducting any amounts owed to the Mexican Oil Fund.

This percentage shall range between 0.5 percent and 3 percent for non-associated natural gas and between 0.5 percent and 2 percent for all other hydrocarbons.
Property Agreements

• The legal hydrocarbon easement comprises the following rights:
• Transit right of persons;
• Transportation, handling and storage of all kinds of construction materials, vehicles, equipment and goods; and
• Construction, installation and maintenance of infrastructure or carrying out works necessary for the development or monitoring of the activities contemplated in an entitlement or E&P contract.
Environment & Safety

• The National Agency for Industrial Safety and Environmental Protection, to be created under accompanying legislation, will issue the rules regarding safety and environmental matters.

Indicator /What to Expect

Strategic Growth Areas Grew by 18% in 2014
Q2 2014 vs. Q2 2013

Collectively these 5 growth markets grew 18% YoY and represented 20% of total KCS Freight Revenue in Q2 2014

- Frac Sand +21%
- Cross-Border Intermodal +30%
- Lázaro Cárdenas +8%
- Crude Oil (37%)
- Automotive +25%

% of Freight Revenue
Burgos Basin Connects to America

Crude Oil Basins & Connecting Partners

Canadian Heavy Oil:
- CPRS – Kansas City
- CN – Jackson
- CN – Cockrell, IL

Bakken Region:
- BNSF – Kansas City
- CPRS – Kansas City

Niobrara Region:
- UP – Kansas City
- BNSF – Kansas City

Cushing Barrels:
- SKOL – Pittsburg, KS

Permian Basin:
- UP – Dallas
- TXPF/FWRR – Dallas

Eagle Ford Shale:
- KCS Direct

Key Takeaway: KCS is uniquely positioned to deliver crude-by-rail from crude oil basins throughout the U.S. and Canada to Gulf Coast refineries
