

Phlebotomy Technician Program

TAMIU

CONTINUING EDUCATION

About the Program

Texas A&M International University's Office of Continuing Education Phlebotomy Technician training program consists of 40 hours of classroom study and lab practice in preparation for the certification exam. Students will gain both theoretical and practical training, learning the skills necessary to perform various tasks involved with blood collection services.

The subjects covered in this course include:

- Anatomy and Physiology of the circulatory system
- Universal safety precautions and procedures
- Methods of patient and specimen identification
- Preparing and performing venipuncture collection
- Identifying color codes used for blood specimens
- Preparing blood specimens for laboratory use
- Review for the Phlebotomy Technician Certification (CPT) exam

Students who successfully complete this program will be awarded a Certificate of Completion by the University.

Financial Aid Information

Tuition assistance and payment plans are available for those who qualify through various lending sources. Speak to one of our student counselors today about your options.

Register Early and Receive a \$200 Discount!

**Early Registration Deadline:
October 18, 2013**

How to Register

Admission to the program is based on a review of the application and interview with the student. In order to complete the application and be considered for admission, students must:

- Complete all registration, enrollment, and student agreement forms
- Provide high school transcripts, GED scores, or college transcripts
- Submit to a complete background check. Applicants who have been convicted of any felony or drug-related crime may not be admitted to the program.

Additional prerequisites include:

- Basic algebra, computer and typing skills (25-30WPM)
- Commitment to a rigorous course schedule.

JOB OUTLOOK

According to the US Department of Labor Occupational Outlook Handbook 2012-2013 Edition

“Employment of clinical laboratory workers is expected to grow by 15 percent between 2010 and 2020, faster than the average for all occupations.”

“Employers typically prefer to hire certified technologists and technicians.”

Certification

This course has been approved by the National Healthcareer Association (NHA). Once a student successfully passes the 40 hours of classroom study, he or she will be registered for the NHA certification exam for Certified Phlebotomy Technician (CPT). The cost of the certification exam is included in the tuition amount. For more information please visit the NHA website at www.nhanow.org.
