

Department of Mathematical and Physical Sciences Presents

The 2008 Colloquium

Thursday

Oct. 23, 5:00-6:00pm

Room LBV 208, TAMIU

Ms. Angelica Hinojosa

Mathematics Teacher, Laredo Early College High School

Dyscalculia

Abstract

Mathematics disabilities go undetected in early education resulting in students lagging behind in their acquisition of mathematics and its related concepts. These students need to be identified and assisted early. Characteristics exist that can enable teachers to identify such students and help them in planning for remediation towards students' success

Refreshment Starts at 4:30pm
