

Department of Mathematical and Physical Sciences Presents

The 2008 Colloquium

Thursday, Feb 28, 5:00-6:00pm

Room 219 Lamar Bruni Vegara Science Center, TAMIU

Free and Open to Public

Dr. Runchang Lin

Assistant Professor of Mathematics

Numerical Mathematics – The Wisdom People Use Every Day

Abstract

Numerical mathematics is one of the most ancient branches of mathematics. It however is also a vast field with the broadest relevance in the modern world. Broadly speaking, numerical mathematics includes any development, analysis, or implementation of algorithms for approximations of solutions to mathematical model problems. This talk is an introduction of the discipline to undergraduate and graduate students. Examples from our daily life will be provided. It would be helpful to convince us that “MATH IS USEFUL & POWERFUL”.

Refreshment Starts at 4:30pm
