

# B.S., Communication Disorders

The mission of the Communication Disorders Program is to provide culturally and linguistically diverse state of the art educational, clinical, and outreach experiences in communication disorders to enhance the quality of life for communicatively impaired citizens of the border region, the State of Texas, and international communities.

## Program Goals

I. Identify trends in professional practice and research principles.

II. Exhibit skills related to the scope of practice of communication disorders.

III. Candidates will exhibit pre-professional clinical writing skills.

## Program Student Learning Outcomes

(What should candidates be able to do when they leave the program?)

### SLO 1

The candidate will apply knowledge of basic human communication process across the life span from infancy through geriatric including the, neurological, acoustic, psychological, developmental, linguistic and cultural bases.

### SLO 2

The candidates will demonstrate clinical knowledge of various communication disorders and differences across the life span.

### SLO 3

The candidate will demonstrate clinical writing skills.

## Assessment of Outcomes

(How will you know candidates' demonstrated the SLOs in courses and in the field? There needs to be three (3) measures for each SLO.)
