

Mentors

“Talking to my mentor was as if I was talking to one of my best friends. I was very open to her and wasn’t scared to speak up.”

“The University Learning Center has been really helpful, especially for my College Algebra class. I attended the ULC at least 3 hours per week and that has helped tremendously!”

ULC

University Seminar Class

“The best part of my spring semester was my University Seminar class. It was a really fun and interesting class and it taught me how to think about things in my everyday life that I would once never ever take a second thought to.”

“My University Seminar class has helped me a lot throughout this year. I learned many things in this class. I learned to manage my time, study habits, and problem-solving. My instructor got us to think more out there than what things really were. Honestly, I would have been quite lost without this class.”
