

TAMIU is participating in the National Cyber Security Awareness Month program run by the National Cybersecurity Alliance (NCSA) to create awareness about cybersecurity. Each week in October, we will provide information and tips on protecting yourself at work and home. Our goal is to help you make the most of today's technology safely and securely.

This week's theme is Today's Predictions for Tomorrow's Internet. With the explosion of digital interconnectivity, it is critical to explore everyone's role in protecting our cyber ecosystem.

Today we will share a newsletter of two-step verification also known as two-factor authentication. Many systems are moving to use this authentication approach. You may already use this type of service.

## And A 2-minute video
