**NURS 4670 Comprehensive Emergent Care.** Six semester hours, three theory, three clinical. This course focuses on the development of advanced nursing knowledge and skills in the acute care of high risk population across the life span. Because students will have contact during the course with individuals and families from diverse cultural groups, health care problems and needs are examined with regard for the unique influences of divergent cultural, economic, and political forces. However, the emphasis of the course is on the mastery of competencies and confidence in the provision of direct nursing care to high risk individuals demanding emergent care. Students will assess, plan, implement and evaluate comprehensive nursing care with clients across the life span at risk during post traumatic events.
