Learning Outcomes: The participants will engage in inquiry-based learning techniques and laboratory investigations, develop skills for writing in science, and prepare a background for assembling a successful vertical team.

Description: Vertical teaming involves a development of basic science skills that lead to the eventual success in rigorous upper level course work as well as aligning a curriculum that provides for a college ready student. This four-day workshop will explore various methodologies for incorporating those skills in the Pre-AP classroom. The participants will participate in lab, writing, and inquiry based activities as well as work on aligning their curriculum and designing their own vertical team plan.
