

WHAT IS LEAP?

LEAP is a partnership between TAMIU and The University of Texas Health Science Center at San Antonio, now known as UT Health San Antonio for an early acceptance program.

Through the LEAP, first-time TAMIU freshmen will be guided through courses and other requirements needed to earn a Bachelor of Science (B.S.) degree at TAMIU. After meeting the necessary requirements and a successful application process, students will then enter into one of five graduate and professional programs in the School of Health Professions at UT Health San Antonio.
