

TAMIU is participating in the National Cyber Security Awareness Month program run by the National Cybersecurity Alliance (NCSA) to create awareness about cybersecurity. Each week in October, we will provide information and tips on protecting yourself at work and home. Our goal is to help you make the most of today's technology safely and securely.

Continuing this week's theme of Today's Predictions for Tomorrow's Internet, we share The Internet of Things (IoT).

Today's message: Learn more about the Internet of Things (IoT)

You may also want to subscribe to [OUCH!](#) — The world's leading, free security awareness newsletter designed for technology users.
