TAMIU is participating in the National Cyber Security Awareness Month program run by the National Cybersecurity Alliance (NCSA) to create awareness about cybersecurity. Each week in October, we will provide information and tips on protecting yourself at work and home. Our goal is to help you make the most of today's technology safely and securely.

Continuing our theme of Cybersecurity in the Workplace Is Everyone's Business, we focus on using Cloud Services.

Please remember that TAMUS policies state that the ISO must review the data security requirements and specifications of any new computer applications or services that receive, maintain, and/or share sensitive information.

View the SANS Cloud Security Awareness Training a 3-minute video that covers cloud and risks of using these services.
